

KONDEPUDI LASYA SAI JAYASRI

Software Consulting Engineer – Network Automation

+91 9553388419 | lasyasrikondepudi@gmail.com | LinkedIn | Bengaluru, India

Professional Summary

Software Consulting Engineer at Cisco Systems specialising in network automation, with hands-on experience in NSO service packages (Python), YANG data modelling, XML-based device configuration, and IAP automation workflows. Also brings a Java Full Stack development background with Spring Boot and RESTful APIs.

Technical Skills

Programming Languages: Java, Python

Network Automation: Cisco NSO (Network Service Orchestration), YANG Modeling, NED Development, XML Templates, Intent Automation Platform (IAP)

Web Technologies: HTML, CSS, JavaScript, Spring Boot, RESTful APIs

Databases: MySQL

Networking: CCNA, Routing & Switching, VLANs, STP, EtherChannel, NAT, DHCP, DNS

Network Protocols: TCP/IP, IPv4, IPv6, OSPF, BGP, SSH, HTTP, HTTPS, SNMP, NETCONF, RESTCONF

Tools & Platforms: Git, Docker, Jenkins, Linux

Professional Experience

Software Consulting Engineer

Aug 2025 – Present

Cisco Systems

Bengaluru

NSO – Network Service Orchestration

- Develop and modify NSO service packages in Python to implement and update network automation logic as per client change requests.
- Write and maintain YANG data models to define service schemas, data validation rules, and device configuration structures.
- Create and update XML templates that auto-generate device-specific configurations during network service provisioning.
- Validate service changes through NSO dry-run, commit, and rollback operations before pushing to production.
- Work across multi-vendor network service packages, applying NED-specific logic to handle device variations during provisioning.
- Debug and troubleshoot service package and template issues by analyzing NSO logs, CDB data, and device configuration diffs.
- Collaborate with clients to translate change requests into service model updates, ensuring changes are tested end-to-end before deployment.
- Integrate NSO with external systems via REST APIs to support automated, end-to-end network provisioning workflows.

Training

Certified Java Full Stack Developer

Jul 2024 – Mar 2025

KodNest Training Institute

Bengaluru

- Completed intensive Java Full Stack Developer certification covering Core Java, Spring Boot, HTML, CSS, JavaScript, and MySQL.
- Built and deployed full-stack web applications using Java, Spring Boot, RESTful APIs, HTML, CSS, JavaScript, and MySQL.
- Gained hands-on experience in backend development, database integration, and REST API development through practical projects.

Projects

E-Learning Platform

Java, Spring Boot, MySQL, RESTful APIs

- Built a full-stack e-learning platform using Java / Spring Boot with service-oriented architecture and role-based access control.
- Integrated MySQL for data persistence and RESTful APIs for frontend-backend communication.

Airline Ticket Price Prediction (Fly-High)

Python, Flask, scikit-learn, pandas, NumPy

- Built a machine learning model in Python to predict airline ticket prices, supporting dynamic pricing and customer decision-making.
- Applied data preprocessing, feature engineering, and Random Forest regression using scikit-learn, pandas, and NumPy.
- Developed a Flask web application with admin dashboard, user login/registration, and live prediction functionality.

Education

Bachelor of Technology – Computer Science & Engineering

2024

VSM College of Engineering

CGPA: 7.8

Certifications

- CCNA – Cisco Certified Network Associate
- Java Programming – KodNest
- Python Programming – KodNest
- Understanding AI and LLMs as a Network Engineer (AI4NE) – Cisco U.
- Automating Networks Using Cisco Platforms (200-901 DevNet)
- Cisco Certified AI Technical Practitioner (810-110 AITECH)
